

Quidos ECO Calculation Software for Green Deal Installers

Overview

Our ECO reporting software is fully approved and this enables Energy Assessors to create ECO reports and calculations.

Benefits for Installers

- **User friendly** You can import an ECP from any scheme and also members are able to download XML, CSV, PDR and site note versions of an ECO report in iQ Energy, meaning your reports will suit providers.
- **Accurate Reporting** You will get accurate carbon scoring from an approved RdSAP engine, meaning your report is acceptable for ECO purposes.
- **Easy Reference** The PDR report will have a unique reference number for easy tracking & reference.
- **Support** If you have added any incorrect data, you can unlock an ECO Report by simply sending a request to support@quidos.co.uk
- **Peace Of Mind** Members are able to view an un-lodged XML for checking over.
- **Multi-Functional** You will have a single page 'Property Data Report' (PDR) that will allow you to produce reports for ECO and Domestic RHI without having to lodge an EPC onto the register. Example below.
- **Flexibility** If your funders still require mid-point and end point reports, you are able to with the Quidos ECO tool.
